Highlights:

- HeatWave popular product for any type of Hair in no time.
- Metallic plates for silky, shiny hair.

How to use:

- Step 1: Connect to 3 pin plug electricity.
- Step 2: Moist your hair
- Step 3: Run along hairs, all through the end
- Step 4: Do not rotate at all.
- Step 5: Can use continuously for 45 minutes (provide 3 minutes break by un-plugging).

Troubleshoot:

Not Starting:

- Step 1: Make sure HeatWave is connected to 3 pin plug electricity.
- Step 2: Any hairs stuck or dust around device?
 - If so, first un-plug the device, remove all hairs and dust.
 - Plug it again to use it.
- Step 3: Is bright Green Light visible at the tip of the device?
 - If so, you need to un-plug for at least 3 minutes before you plug again. With this you are good to operate back.
- Step 4: Do you see small Red Light at the tip of the device but not starting?
 - If so, press and hold small round button for 10 seconds – this should re-start and turn into Green Light.
